Hub Director's Message

Fr. Dr. C.J. George

Executive Director
Don Bosco Ashalayam, Kolkata
YaR Coordinator INC Province

Children are the best assets or the real future of humankind. They need the maximum support, help and assistance. The reality around us brings to light that many children are lost, defocused and even seen as a liability. In this context Child MISS (Management information Service and System) assists people who are interested in the promotion of children and their welfare to assist them.

It is a web-based software tool to assist child friendly organizations with proper and adequate data management. YAR forum India has played a vital role in the lives of thousands of children who are in need of care and protection. It calls for prevention of trafficking, rescuing and restoration; essentially it adds on to the protection of the unprotected children by promoting a larger network to assist children. I wish and pray that this system may benefit many more children who are in the margins of society.

Hub Coordinator's Message

Aniruddha Bhattacharyya

It is a golden opportunity for me to work as a hub coordinator for the Kolkata Hub. For the last three years, I have been working in Don Bosco Ashalayam, Kolkata as a Hub Coordinator and Documentation In-Charge.

CHILD MISS (Management Information Service and System) is a web-based tool to help both government and non-government organizations document their services, so that they can use a single window system to enhance their services for children at risk more effectively and efficiently.

ChildMISS is not only meant for data entry but also helps the organization for analyzing the data to find out the current trends among children. It also helps to make data-led decisions.

Child MISS helps with effective data management, monitoring, and instant reporting. Child MISS is a solution focused system initiated by a group of people who have served the children on the street and later found difficulty in maintaining the documents for reporting and fulfilling the growing demand of authorities.

Snippets

The snippet is a concept taken up by HomeLink Network for visualizing the data in infographics to simplify data. It is a small piece of visual information.

The Kolkata Hub released more than 20 snippets last year.

Flow Chart

A child flow chart is a diagrammatic representation of children's flow. In these flowcharts, the organization shows the movement of a child gradually from the beginning of contact till restoration or final settlement of a child. These flowcharts vary from project to project, center to center. Every project and center has set up its system for functioning, and the flow of children changes accordingly.

Achievements

INC - PROVINCE

Achievements Of HUB

1 Social Audit

Done for Ashalayam for all the centers

2 Infographic Report

Prepared for monthly and shared with Doner

3 20 Snippet Reports

Hub and Node wise made and shared

4 Hostel Guidelines

Training given to all the staff and application filed

5 Prison Ministry

Documents studied and process started
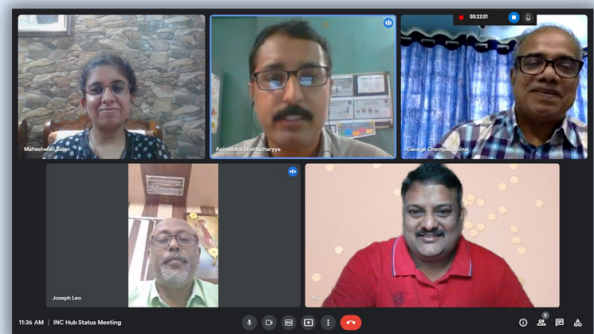

Training and Participation

Hub Coordinators' monthly meeting with the HomeLink National team and Hub Directors

Conducted Node level status meeting with Hub Director, YaR Leader and Node Directors

Follow-up meeting with the Director and the staff of the Prison Ministry, Berhampore

Hub status meeting with YaR coordinator and National Team

Hands-on training on the ChildMISS tools

Conducted training for Childline staff in the intervention process

The Child Flow diagram was shared with the Childline team and explained the uses

A motivation session was taken for children and explored means of life

A certificate was received for working continuously toward marginalized people during the lockdown from DBA

HomeLink Network is an ongoing initiative started by DB YaR Forum in 2002. To ensure an appropriate timely and real-time response to the needs of the young at risk, based on accurate documentation and data analysis supported by the best of technologies available today.

Towards our expert Homelink teamwork...

- Developing a data-driven child care system through documentation, research, and networking.
- Systematic documentation of organizational systems, processes, and workflows.
- Data-led intervention planning in organizations.
- Data-based advocacy and engagement with stakeholders and government on child issues.

Utilizing current advances in digital technologies in service working with Young at Risk.
