HUB DIRECTOR'S MESSAGE

It is my pleasure to write these few lines as we release the Annual report of HomeLink, Bangalore Hub for the year of 2023 – 24. My hearty congratulations to Mr. Joshua, the Hub Coordinator for his great efforts in bringing out this Annual Report. We had another year with so many activities and we were able to capture some of these activities in quantitative form, through Homelink.

Our Hub also received some awards at National level. My hearty congratulations to all those who received the awards. I am grateful to the National DB YaR forum for conducting the award competitions and all the other supports they extend to our Hub. My sincere thanks to all the Node directors and the staff of HLK for making use of the HLK tool for documentation. My sincere thanks to Fr. James Paul, the outgoing YAR Coordinator of our Province and hearty welcome to Fr. Previnth, the new YAR Coordinator. I also take this occasion to thank all the outgoing Node directors and to welcome the new Node directors.

As we begin the new academic year, my request to all the Nodes is that we have to make greater efforts in documenting the data, generating the data and make the best use of the data to make greater impact in our work with YAR. Please have discussion on the data, in your staff meeting so that you can take data-driven decisions to be more effective in your involvement with the children and youth. As you know, we are going to have the new tool known as Digital Intervention Global Enterprise (DIGI) instead of HomeLink. Some of you will be attending the training program to have a better understanding of the different features of this new tool and how to make use of this tool for better documentation process. I wish all of you all the best for the coming year.

A handwritten signature in blue ink, reading "Varghese Pallipuram".

**Fr. Varghese Pallipuram SDB,
Hub Director, Bangalore Hub
Homelink documentation Program**

YAR COORDINATOR, INK MESSAGE

The life of children is challenged with numerous issues in India. In the digital world numbers of challenges have brought down the developments and opportunities for these children. At the same time Governments, NGO's and other similar organisations are focusing to support and empower children and young at risk.

Interestingly Homelink network is dedicated to work towards this goal and ensuring safely for the children and young at risk. We believe that this system (HLK) is very important to make a study for the overall development of the children and the society in an organisation.

I feel a great enthusiasm and passion in digitalizing the data in our YaR centres and social services of the province but very few are committed. By consider this system or tool seriously, the centres can generate the reports, look in the high possibilities of analysis and get data, informations for project proposals in professional manner. Let us join our hands together for the brighter future of children and Young at risk.

I profusely thank Fr. Varghese Pallipuram the Hub Director of Homelink, and Hub Coordinator Mr. John Joshua for their planning and implementation of the Homelink documentation tool in all the Nodes, YaR centres and Social services of the province. I also welcome and wish all the best to Fr. Previnth Joe Tony the successor of me to be the YaR Coordinator of the INK Province to progress YaR mission to the greater heights.

A handwritten signature in gold ink, appearing to read 'James Paul', with a stylized flourish at the end.

Fr. James Paul
YAR Coordinator, INK Province

MESSAGE FROM HUB COORDINATOR BANGALORE

I am delighted to present the Bangalore Hub Annual Report 2023-24. As another financial year passes, I reflect with gratitude on the joy Homelink Bangalore Hub has brought to children and young people in need of care and protection.

While reflecting on our ten-year journey, we have made significant progress, learning, implementing changes, and achieving many goals together. I thank each individual for their contributions through the Homelink Child MISS (Child Management Information System and Service) documentation tool. We have fostered a data-driven culture, extending our efforts beyond child care institutions to the community, identifying needs, and acting accordingly based on timely data analysis and documentation.

This Hub Annual Report offers an overview of our work visible, encouraging more to join in our mission to improve children's lives. The documentation tool enables accurate data analysis and timely decision-making, leading to organizational improvements. Under Don Bosco YaR Forum, Homelink Network is advancing with a new scientific tool, Homelink DIGI (Data Intelligence for Global Interface). This digital documentation ensures secure, password-protected records, preventing unauthorized access and data breaches. It preserves information efficiently, adapting to new technologies, and saves time by providing easy and fast access.

I extend my heartfelt thanks to the Homelink National team under the leadership of Fr. Joseph Prabu, National Director, DB YaR Forum for their support and guidance. Special thanks to Fr. Varghese Pallipuram, Hub Director, Bangalore and Fr. James Paul, YaR Coordinator, INK Province for their regular guidance. I also thank all Node Directors and staff for their invaluable contributions to the achievements.

A handwritten signature in black ink, likely belonging to Mr. John Joshua Nirmal.

Mr. John Joshua Nirmal
Hub Coordinator, Bangalore

HOMELINK NETWORK

Homelink Network is an on going initiative started by DB YaR Forum in 2002, to ensure appropriate, timely and real-time response to the needs of the young at risk, based on accurate documentation and data analysis supported by the best of technologies available today.

WE WORK TOWARDS

Developing data driven childcare system through documentation, research, and networking

Systematically documenting the systems, processes, and workflow of the organizations

Data led intervention planning in organizations

Data driven advocacy and engagement with stakeholders and government on children's issues

Harnessing current advances in digital technologies in the service of the work with young at risk

Thank You !
